

LCDone - LaserCuttingDevice *Cut and Seal in one work process*

The LCDone is the perfect solution for Soft-Signage finishing applications. Textiles, which might fray after cutting, can be tailored and edge-sealed in one work process.

This special, with sophisticated process technology developed tool head, can be operated without conversion parallel to the DrivenWheel and to the MultiHead on the ARISTOMAT[®]. Flexibility and Profitability of your production will be increased. Without additional set-up times the combination of all these tool heads working in even one job together is the best set-up in Soft-Signage industry. Low noise and a powerful suction ensures a good integration in your business process.
